01/22/2018	<sup>5.0</sup> Quality: 5.0 Customer Service: 5.0 Value for Money: 5.0	Review by Linda W. in Visalia, CA Project: Install Electrical Switches, Outlets, and Fixtures Comments: Would highly recommend. Called to discuss project so he was ready when he arrived, call to let me know he was on his way, was efficient, did not waste time, completed timely and efficiently. Explained what he was doing while he was doing it, the need for what he was doing, what he found and how he fixed. In the midst of his repair, he found another issue and since he was already there, he fixed that at no extra charge since it did not involve any parts. <a href="#">Add Your Comments to This Review</a>

They drove quite aways as I am located in Bakersfield, CA. He replaced my electrical panel box and upgraded all my breakers. Not only did he do a great job at a great price, but. 3 weeks later when I had what I thought was a issue with the panel, he returned promptly and at no charge addressed the issue. I highly recommend him and if he is available will use him again if needed. Matthew O'Donohue</p> <p><a href="#">Add Your Comments to This Review</a></p>

I called home advisor with an emergency electrical issue that could have impeded the sale of my house, and he called me within 2 minutes of that call. He gave me a ETA to get to me for about an hour and a half later. He was actually 10 minutes early. I explained my issue, he listened attentively, problem solved the mistake that I created, and promptly went to work to fix it. He explained what I had done wrong, patiently and without judgement and when he was finished my problem was resolved! Fantastic! <a href="#">Add Your Comments to This Review</a>
